**Brooklyn
Community District 13**

INTRODUCTION

The annual Statements of Community District Needs (CD Needs Statements) and Community Board Budget Requests (Budget Requests) are Charter mandates that form an integral part of the City's budget process. Together, they are intended to support communities in their ongoing consultations with city agencies, elected officials and other key stakeholders and influence more informed decision making on a broad range of local planning and budget priorities. This report also provides a valuable public resource for neighborhood planning and research purposes, and may be used by a variety of audiences seeking information about New York City's diverse communities.

HOW TO USE THIS REPORT

This report represents Brooklyn Community Board 13's *Statement of Community District Needs and Community Board Budget Requests for Fiscal Year (FY) 2018*. This report contains the formatted but otherwise unedited content provided by the Community Board, collected through an online form available to community boards from September to November 2016.

Community boards may provide substantive supplemental information together with their Statements and Budget Requests. This supporting material can be accessed by clicking on the links provided in the document or by copying and pasting them into a web browser, such as Chrome, Safari or Firefox.

This report is broadly structured as follows:

a) Overarching Community District Needs

Sections 1 – 4 provide an overview of the community district and the top three pressing issues affecting this district overall as identified by the community board. Any narrative provided by the board supporting their selection of their top three pressing issues is included.

b) Policy Area- Specific District Needs

Section 5 is organized by seven distinct policy areas aligned with the service and program areas of city agencies. For each policy area, community boards selected the most important issue for their districts and could provide a supporting narrative. The policy area section also includes any agency-specific needs and a list of relevant budget requests submitted by the Community Board. If the community board submitted additional information outside of a specific policy area, it may be found in Section 6.

c) Community Board Budget Requests

The final section includes the two types of budget requests submitted to the City for the FY18 budget cycle; one list for capital and another for expense budget requests. For each budget request, community boards were able to provide a priority number, explanation, location, and supporters. OMB remains the definitive source on budget requests submitted to city agencies.

3. Overview of Community District

Community Board 13 is Coney Island, Brighton Beach, Sea Gate and Gravesend, we are surrounded by water.

We are a growing community with residential and commercial developments. We have a large growing NORC population that has to be address, with large immigrant community that has special needs. The new Russian immigrants are moving into the NYCHA projects and high rise developments changing the needs in the area. Also with our seasonal amusement area, the residents have to cope with increase traffic congestion and the limited parking space. We also realized that the community was not prepared for a disaster.

After Superstorm Sandy, we realized that we needed to protect our shoreline. We need to have short term and long term goals to fix the shoreline. For the short term solution, we need to shore up our beaches, creek, bayside, etc. with sand dunes and sea grass. We understand that Parks Department has a difficult time in maintaining the dunes but in the long term it will hold the sand in place and protect us from tidal surges. The long term solution, we need Army Corps of Engineers and the federal government to fund the project that will protect us in the next disaster however that might be.

We are concern about the increase in the flood insurance rate. We know it will increase dramatically and will affect the small homeowners, renters and businesses in the area. The government has to prevent this or homeowners will lose their homes due to the increase. One option is Build It Back program. Their option is to elevate the houses above the flood level to make the house resilient and to avoid the rate increase. The only problem is there are only a handful of homeowners are qualify and the rest will have to figure out how to pay the increase.

The flood insurance rate increase will affect the high rise developments, too. They will pass the increase costs to the renters through the monthly bills and maintenance fees. The NORC in these high rise developments are on a fixed income and will find it hard to pay the increase. With these increasing rates, the people will be forced out of their homes. We would call this insurance gentrification, where the neighborhood would change not because of hipsters but the increase of flood insurance rates.

4. Top Three Pressing Issues Overall

The three most pressing issues facing Brooklyn Community Board 13 are:

- *Commercial development (retail mix, small business and MBWE support, etc.)*
- *Traffic*
- *Other/Sandy Recovery and Future Resiliency*

1) Sandy Recovery and Future Resiliency: High-rise structures, notably those of the City's Housing Authority, still evidence signs of the storm's devastation – the smell of mold, the shattered and still non-usable community centers, abandoned homes, empty stores and civic facilities. Emergency generators, brought in after Sandy hit, are still in place at some buildings and schools, and they cannot provide the need for residents when temperatures fall below 40-degrees. Homes need to be fix and elevated to avoid the next flooding. 2) Traffic: Traffic is one of the key worries for the peninsula. Motorists coming in and out of Coney Island, Brighton Beach, Sea Gate and Gravesend find themselves trapped in bumper-to-bumper traffic. We find there is a limited amount of parking space and parking lots and when they are filled up, the motorists circle around the area causing a traffic nightmare. It is a sad fact for residents of Coney's west and Sea Gate to find themselves stuck, during an event or hot summer day, in gridlock for an hour in order to leave the vicinity; some simply turn back home. But emergency vehicles of Fire, Police, ambulances, EMS may have difficulties as well. 3) Economic Development: There is a need to build up the community with residential and commercial development. Currently, there are plans to construct a 40-story residential tower in our community. We need to upgrade our infrastructure to substance the new development.

Main Issue Related to Health Care and Human Services

Other/Community Board #13 needs a C1 Trauma Center in Coney Island Hospital.

There has been an increasing amount of people coming into the area by new development and summer time crowds. We realized that is time of essences for patients needing C1 Trauma Unit. The nearest hospital with a C1 Trauma Center are Lutheran Hospital and Kings County Hospital which are easily a 15 minute ride during the summer time. A C1 Trauma Center is needed in Coney Island Hospital.

Community District Needs Related to Health Care Facilities and Programming

Community Board #13 needs a C1 Trauma Center in Coney Island Hospital. Our hospital needs to address the growing population in the area. Time is of essence when a trauma patient is taken away from the area. If there was a C1 Trauma Center incorporated into Coney Island Hospital would cut down in time for helping the patient. There is a growing immigration population. They are either unaware or afraid to enter a hospital because of a language barrier or afraid of deportation, the neighborhood health facilities has to conform to the neighborhood and outreach in their native language or the patient will not come.

Community District Needs Related to Facilities and Programming for Older New Yorkers

Community Board #13 is a growing Naturally Occurring Retirement Communities (NORC). With an aging community, we have to address the needs to this growing population. We find the older residents tend to live independently with their services nearby. As household size decreases and income is fixed, the residents downsize their apartments and remain in the area. Health care providers are needed to check in to see if everything is okay. Senior centers have grown giving the residents something to do during the day.

Community District Needs Related to Facilities and Services for the Homeless

There has been an increasing amount of seasonal homelessness in our community. Homeless people come down during the warmer months but never seem to leave until the weather becomes brutally cold. We need to address this problem year round. We DO NOT need a homeless shelter to address this problem because the community already has SEVEN (7) NYCHA developments in a half mile radius. Coney Island has been the dumping ground for low income families and we do not need to oversaturate the area with a homeless shelter. We are slated for affordable housing in our area and a veteran housing development. We do not saturate the area with more low income developments.

Community District Needs Related to Services and Programming for Low-Income and Vulnerable New Yorkers

We need to help the low-income and vulnerable people in our community by providing job training, placement support, food assistance such as Food Stamps, improve delivery of emergency food and shelter in case of disaster. We also need to provide social services to domestic violence survivors and provide case management for persons living with HIV or AIDS. With seven NYCHA developments, there are not enough programming to address the issues. We DO NOT need a homeless shelter, it would burden the area with more problems.

Youth, Education and Child Welfare

Main Issue Related to Youth, Education and Child Welfare

Youth workforce development and summer youth employment

After Superstorm Sandy, our community centers and other community facilities were destroyed. Our youth had no place to go for after school programs or community centers to keep them occupied. With that there were no place for youth to go to, there were no place for a workforce development. We have a Workforce1 for Sandy Victims but we need a training center for the youth in the area.

Community District Needs Related to Educational Facilities and Programs

Our biggest concern in our neighborhood is reopening our community center that was destroyed by Superstorm Sandy. After four years, some community centers are still closed and need to reopen soon. The youth have no where to go and limited resources out here to occupy them during the year. Workforce1 has helped the young adults but the community centers are need for the children. Safe community centers need to be rebuild and made resilient to address the needs of the area. A long term solution is to build a recreational center to address this need that would be intergenerational, multicultural, educational, multi-use recreational facility. This could be tied into the ferry system along the Coney Island Creek making it a ferry terminal and a boathouse to do water activities.

Community District Needs Related to Services for Children and Child Welfare

The early stages of child development is very important and we need quality childcare services in our daycare and head start centers. We need to rebuild childcare centers and improve on their service. After Superstorm Sandy, childcare and head starts center were destroyed and had to be rebuilt. Some are still not rebuilt and the void needs to be filled. The centers are either doubled up or ceased to exist. We have to rebuild or build new centers to have quality childcare services.

Community District Needs Related to Youth and Community Services and Programs

With the aftermath of Superstorm Sandy, the community centers were all damaged. The youth had no place to go for afterschool activities. Four years later, some centers are still not open due to relief funding priorities. The youth needs their community center rebuilt and upgrade. Youth programs are needed to keep the youth off the street and a safe place for them to play. Some services provide to the neighborhood were destroyed by the Sandy, never had a chance to rebuild and closed their doors. Others collaborated together to stay afloat until relief funds were available to get back on their feet.

Public Safety and Emergency Services

Main Issue Related to Public Safety and Emergency Services

Youth crime

Youth crime and gun violence are our biggest issues in our area. Having gun violence as the norm was not acceptable to the neighborhood. Community activists started to take back their streets. Cure violence programs such as Project H.O.O.D. (Helping Our Own Develop), camera surveillances, shot spotter, discipline leadership at the 60th Precinct made it possible to have a 40% decrease in crime and gun violence. We still need to address the youth crime due to the lack of community center destroyed by Superstorm Sandy. Youth are hanging out on street corners with no place to go need a safe place to play.

Community District Needs Related to Policing and Crime

A summer detail is made available for the 60th Precinct, but growing crowds indicate that added personnel is needed. We additional uniformed officers to keep law and order in community that has summer crowds in the thousands. The community is neglected when the officers are diverted to control the crowds. We need traffic enforcement officers to help direct traffic coming and going out of the area. We need them to keep the traffic flowing and ticket motorist from double parking and illegally blocking traffic in the area.

Community District Needs Related to Emergency Services

Our community stress highly on emergency/disaster services needs. Ever since Superstorm Sandy, we have found ourselves vulnerable to the environment and the increasing developments around the area. We need to be prepared for any situation whether it be another Superstorm Sandy, or a blizzard or even a blackout we have to protect our community. We need to have a local emergency center for emergency/disaster.

Core Infrastructure, City Services and Resiliency

Main Issue Related to Core Infrastructure, City Services and Resiliency

Protective Infrastructure (sea walls, flood walls, etc.)

After Superstorm Sandy, the community realized that our shorelines were not protected and we must protect our infrastructures. Short terms goals such as sand dunes, are needed for immediate protection. Long term goals such as living breakwaters will take time to implement and construction. We need to proceed with a definitive plan for the area, so that another hurricane season doesn't pass by without preventive measures in place.

Community District Needs Related to Water, Sewers and Environmental Protection

Our biggest issue to protect our shoreline from the next disaster. After Superstorm Sandy, we realized how vulnerable our shoreline are during a hurricane. We need to upgrade and maintain our sewer lines. Currently, DDC is upgrading our sewer line from West 15 Street to West 24 Street, we need to continue this throughout the whole community. We are also looking into relocating our sanitation garage to another site by the National Grid property by the Coney Island Creek. We understand that the garage will house two sanitation district. We are looking into incorporating a community facility use for monitoring water quality testing in the creek. We would look to connect with the local schools and institutions and city agencies to use this facility.

Community District Needs Related to Sanitation Services

Construction of Sanitation Garage for Community Board #13 has been promised to the community since 1980. The current site is on West 21 Street and the trucks are situated behind people's backyards. A new site has been located by Shell Road and the Belt Parkway by the Coney Island Creek. We are still interested in moving the sanitation garage to the new location. It will house two garages (BK13 and BK15) at the new site. The community is also looking for a community facility use in the new garage for testing the water quality and would like to have a room for the youth and schools/institutions and agencies to monitor the creek and keeping it clean. Land Use, Housing and Economic Development

Main Issue Related to Land Use, Housing and Economic Development

Commercial district revitalization

Commercial district revitalization is important in our neighborhood. We lack the basic stores for the local residents. They have to travel outside of the area to do their shopping needs. New developments are being built, trying to incorporate retail store on the ground level and residential unit on the upper levels. The commercial district revitalization is needed to boost up the neighborhood and keep the business at bay. We need to look into a BID for the area to handle the commercial issues in retaining them and entice new businesses to come into the area.

Community District Needs Related to Land Use

We need to have more building inspectors to enforce the building codes in the neighborhood. Illegal conversions of buildings are being subdivided and are not up to code. It is a health and safety concern dealing with unlivable conditions and fire hazard with overloading the existing utilities. We need to do a land use study to see what is present and available and what is needed for the future.

Community District Needs Related to Housing Needs and Programming

Our concern in our community board for housing is our area is being overdevelop with apartments. Property owners are building apartments on a small parcel of property. We are oversaturated with large developments that our infrastructures made not handle the increase. Our concern is with traffic flow and parking. With new developments, there isn't enough adequate parking space to accommodate the renters. We need to continue to address the housing issues in the area by support our local housing groups.

Community District Needs Related to Economic Development

We need economic development to the area to stimulate the community. With economic development comes jobs for the community. It will help the local economy and bring new business into the area. With the development of residential and commercial projects, we have to remember of the traffic problems, limited parking spaces and other infrastructure issues. We cannot develop without looking at the existing infrastructure and how it will impact on our limited services.

Transportation

Main Issue Related to Transportation

Traffic enforcement

With successful developments come increased problems with traffic. It is one of the key worries for the peninsula. Motorists coming in and out of Coney Island, Brighton Beach, Sea Gate and Gravesend find themselves trapped in bumper-to-bumper traffic. During a major event or a hot summer weekend, it is a traffic nightmare and it has now become a safety issue for emergency vehicles getting around the neighborhood. It is a sad fact for residents of Coney's west and Sea Gate to find themselves stuck in gridlock for an hour in order to leave the vicinity; some simply turn back home. Traffic enforcement officers to ticket illegal cars double parked or direct traffic to flow smoothly during major events are needed in the area.

Community District Needs Related to Traffic and Transportation Infrastructure

As mentioned before, traffic congestion and limited parking spaces are a major issue in the area during the summer time. We need to do a traffic survey to alleviate the congestion issue and figure out what can be done. One issue to address the problem is to have a ferry system to Coney Island to give people an alternative way of coming into the area other than using their cars. Another idea is to build multi-deck parking lots to accommodate the increasing cars coming into the community. The MTA needs to provide express service to Coney Island so people can travel to and from the area in less than an hour.

Community District Needs Related to Transit Services

The city, borough, and community all urge people to use public transportation, and, in the case of summertime Coney Island and Brighton Beach, it is the wisest move, but Transit uses weekend hours to fix its subway lines for needed rail and station work. The resultant shifts in movement of F, Q, and other lines prove delays and confusion. The result: people may use cars. We need to improve on the bus service coming into the area. We need to have express bus service over the weekend and B82 ending in Coney Island rather than stopping at Cropsey Avenue and 25th Avenue. Also the electronic kiosks to notify the public how long until the bus arrives at the stop.

Parks, Cultural and other Community Facilities

Main Issue Related to Parks, Cultural and other Community Facilities

Other/Protection for our shoreline.

We need to protect our shoreline from future storms. After Superstorm Sandy, we realized that we were vulnerable to future storms and need to build it up. We need to look at short term and long term solutions to enhance our shoreline. On the short term solution, we need to create sand dunes and plant sea grass for the beaches, creek and bayside. They will protect us from tidal surges and sand erosion. Long term solutions have not been determined yet. Community input and federal funding will dictate how the long term solution will look like.

Community District Needs Related to Parks and Recreational Facilities and Programming

As mention before, we need to protect our shoreline from the next major storm. We have to secure the shoreline or all will be washed away with the next major storm. In addition, we need to repair and maintain our boardwalk. With part of the boardwalk falling apart will lead to lawsuit against the City. We need to fix the bathrooms and rebuild the ones on the west end of Coney Island. We need a New recreational center in Kaiser Park. The community needs an affordable recreational center that will be intergeneration, multicultural, educational, nature conservatory, adult vocational training center, emergency center, greenhouse, boathouse, ferry terminal, sport related activities, indoor skate board park, boxing ring, etc. This center would be located behind Mark Twain JHS which would wrap around to West 23rd Street to West 25th Street. This would also include parking space/garage for people using the ferry for their daily commute. We would like to model the recreational center like Ocean Breeze Complex in Staten Island.

Community District Needs Related to Library Facilities and Programming

We need to upgrade our library facilities with more computers and innovative ideas to attract readers and the community. We need to expand the library hours and have weekend services, too. We also need more diverse variety of books in other language for the immigrant population.

Community District Needs Related to Community Boards

We need to continue increase our presence in the area for people to use the community board as the central agency to handle local and community wide issues. We need to expand the staff and hire consultants to address the issues and solve current issues. We also need to relocate the board office to the ground floor to be closer to the public. This will give us the presence in the neighborhood.

10/66	DEP	Build new, expand or repair sanitary sewers	We need to repair and expand our sanitary sewer lines. Since Superstorm Sandy, our sanitary sewer lines were not able to handle the water levels of a hurricane. The older sanitary sewer lines need to be expanded/replaced throughout the community.		
11/66	EDC	Invest in piers or other capital projects to improve access to the waterfront	We need to invest in our piers and other capital project to improve access to the waterfront. We realized that if there is a problem with traffic and parking, one solution is to use our waterfront. We would like to build a ferry terminal along the Coney Island creek at West 23rd Street. This would address local commuters to use the ferry to get to Manhattan for the price of a Metrocard. During the summer, this would be an alternate way of getting into Coney Island without using a vehicle.

The tree beds can be made into bio swales to collect the run off water before hitting the main sewers.		
28/66	DOT	Make infrastructure investments that will support growth in local business districts	We need to address the parking situation and the traffic flow for the area. We realize during the summer time when tourists and beachgoers come to the area, they are searching for free parking. They fight for the same spot as the local residents does. When they leave at night, there is a mass exodus from the area and causes a gridlock throughout the streets. This causes a safety concern for emergency vehicles that cannot move if the traffic is backed up.
