

THE CITY OF NEW YORK

BOROUGH OF THE BRONX

COMMUNITY BOARD 7

GREGORY FAULKNER, CHAIRPERSON

FERNANDO P. TIRADO, DISTRICT MANAGER

COMMUNITY DISTRICT NEEDS STATEMENT FOR FISCAL YEAR 2010

Introduction

Bronx Community Board 7 is located in the northwestern section of the borough and is comprised of all or part of the neighborhoods of Bedford Park, Fordham, Jerome Park, Kingsbridge Heights, Mosholu, Norwood, University Heights, and a portion of the Marble Hill section of Manhattan. We are bordered by Webster Avenue on the east, Woodlawn Cemetery and Van Cortland Park on the north, Goulden Avenue on the northwest, the Harlem River on the southwest, Hall of Fame Terrace on the south, and Fordham Road on the southeast.

There are many attractions in or near Community Board 7 such as the Botanical Gardens, Van Cortland Park, the Bronx Library Center, the Kingsbridge Armory, the Bronx's Education Mile, the Hall of Fame for Great Americans, Bronx Historical Society, Montefiore Hospital, and the world renowned Bronx High School of Science. The district is home to many post secondary educational facilities such as Lehman College, CUNY on the Concourse, and Monroe College and is also adjacent to Fordham University and Bronx Community College.

Business is booming and there are many important economic engines that drive the local economy, including the Fordham Road Business Improvement District, which is the largest BID in the borough and the third largest in the city. Other important economic centers are the Jerome-Gun Hill BID, the Bainbridge-204th Street Merchants Association, and the Bedford Park Merchants Group. Two up and coming business developments coming to the district are the Kingsbridge Armory Development Project and the proposed Webster Avenue Rezoning Initiative. The former plans to develop the "Shops at the Armory", which will include a mix of retail, professional, and entertainment business in Kingsbridge Heights. The latter proposes to create new residential and commercial opportunities on Webster Avenue between Fordham and East Gun Hill Roads with easy access to Manhattan and upstate New York via the Metro North Railroad.

Economic Development

Small Business Development

Small businesses are the lifeblood of many communities, and our district is no exception. In light of the recent economic downturn, it is important that services that help promote small business development continue to be made available through the Department of Small Business Services to help foster a new generation of entrepreneurs, especially amongst minority and woman-owned businesses. Chief amongst these services is the assistance in identifying lenders to provide credit and in increasing incentives for small businesses to startup in our district.

Equally important are the services provided by the Small Business Services (SBS) Workforce 1 Program, which provides assistance in the form of job training, placement, skill development, and recruitment. According to the last US Census, the average percentage of people in the civilian labor force that is unemployed range from 6.6% to 9.1% in Community Board 7, which is higher than the national average. It is imperative that funding for the Workforce 1 Program be expanded to help address these chronic levels of unemployment we face in our community.

Development at the Former Fordham Library

It has been brought to the attention of the community that the Department of Health and Mental Hygiene (DOHMH) is seeking to acquire the former Fordham Library on Bainbridge Avenue near Fordham Road for the purpose of establishing an Animal Care and Control Borough Office. The community is vehemently opposed to the placement of such an establishment in the heart of the busiest commercial strip in the borough. This type of establishment is completely out of context with the surrounding neighborhood and businesses and the community strongly urges DOHMH to find an alternative location either in our district or in the borough.

The community strongly believes that the city is trying to force institutions in a community without consideration or planning with the Board. This building is the same site that community board members have advocated for in the past few years to develop into a mixed use commercial building that would provide much needed services such as jobs, business opportunities, child care, and youth services.

The Board is asking the Department for Citywide Administrative Services (DCAS) and the NYC Economic Development Corporation (EDC) to consider the community's desires for both economic development and providing much needed social services. There have been several requests by investors to develop the site to fulfill the community's requests and we implore DCAS and EDC to hear them out before any consideration is given to DOHMH's proposal.

Education and Libraries

School Construction Authority and School Development

The community strongly disagrees with the School Construction Authority's (SCA) assessment that additional schools are not warranted in our neighborhoods, as identified in the 2008 amendment of the existing five-year plan. The number of school seats on all levels has not kept pace with the increase in residential development in our community since the last census, pushing all of our schools to operate at over 100% capacity and a handful of schools to operate at over 200% capacity.

This situation is not conducive to a healthy learning environment and we impress upon the SCA and the Department of Education (DOE) to reexamine its current five year construction plan to devise a better solution for our children's educational needs.

Part of this solution is to reconsider the development of schools on the north side of the Kingsbridge Armory complex, which currently houses the National Guard. The governor's office is currently looking to relocate these offices and this provides an opportunity for the SCA to reconsider a plan for schools on this property. The board has, for many years, supported the building of additional schools at this site and we urge the SCA to come up with a plan for one or more schools to catch up with the increasing demand for more space.

Additionally, too much space is wasted on the use of Transportable Classroom Units that have become commonplace in our district. While we are encouraged by SCA's plans to remove these units and put new buildings in some locations (e.g. PS 94), units at others schools (e.g. PS 56) are long overdue to be replaced with a permanent building that also provides much needed recreational space.

Resources Conducive for Learning

It is important that our children are provided with opportunities to grow and have positive experiences that are outside of the realm of standardized testing. We urge DOE to maintain funding and, wherever possible, implement new programs to introduce children to the arts and music.

Additionally, the lack of time or appropriate facilities for physical education can have negative impacts on a child's ability to learn. It is strongly recommended that provisions are made to ensure that children in our schools are meeting the state mandates for physical education. One school in particular, PS 51, The Bronx New School, has no gym or adequate play space available in or around the school.

The community board has advocated on the behalf of the parents of this school for several years and has spoken to DOE on multiple occasions to acquire a nearby vacant lot that is ideal for a playground, but to no avail. With the support of our local elected officials and the Parents' Association, we expect once again to bring DOE to the table in the hopes that an agreement can be hammered out to make this playground available to our students.

Support for Our Libraries

The Bronx Library Center is a beacon for learning located in our district and is one of but a handful of libraries that offers a full 7-day-a-week service in the borough. It offers a wide array of programming, lectures, internet access, and other activities that would be otherwise inaccessible to area residents.

In these difficult financial times, we urge the city to find ways to maintain full service at both the Bronx Library Center and our Moshulu Branch to continue to provide our communities with opportunities for learning and growth.

Environment & Sanitation

Department of Environmental Protection (DEP) Satellite Offices

As stated in the Citywide Statement of Needs for Fiscal Years 2009-2010, DEP proposes to convert the space at the Jerome Avenue Yard, located at 3201 Jerome Avenue, into a permanent DEP facility that will house both the Water and Sewer Maintenance Units. With the construction of the Croton Filtration Monitoring Plant and the renovations at the Jerome Park Reservoir, both along the borders of our community board, it is vital to have the appropriate services and staff nearby to properly maintain the water system. The Board is supportive of the decision by DEP to purchase the aforementioned property to consolidate its services in the borough.

It is also important for DEP to consider other units that can be consolidated into this facility to better service the local community's and the borough's needs. The Board recommends that permanent offices for the Bronx Inter-Governmental Affairs representative and the Community Affairs liaison in this facility are ideal due to the magnitude of these projects and how they will affect the city's water supply.

Enforcing Environment and Sanitation Regulations

There are many concerns by community residents over the perceived lack of enforcement in both environmental and sanitation issues in our district. While the Board understands the difficulty in enforcing certain issues (i.e. noise), the board strongly recommends that the departments of Environmental Protection and Sanitation increase the number of enforcement officers and redouble its efforts to address our quality of life issues.

These quality of life issues are particularly distressful in our business districts, as they lend themselves to negative perceptions to both residents and consumers shopping in our neighborhoods. We ask that the Department of Sanitation (DOS) not reduce resources that would unduly shift the burden of regular street and sidewalk cleanliness upon our local businesses in light of the current fiscal crisis.

Additionally, in areas where responsibility for maintenance is shared by multiple agencies (i.e. subway entrances on overpasses), we implore DOS to work closely with those agencies to maintain basic levels of cleanliness for the district.

Construction at the Croton Filtration Plant and Related Projects

Community residents and activists are greatly disturbed by the extensive project delays and massive cost overruns associated with the development of the filtration plant at Van Cortland Park. The Board is also concerned about DEP's decision to digress from the original Environmental Impact Study in portions of the construction plans, particularly around the Jerome Park Reservoir.

The Board strongly urges that DEP does not further compromise the project by deviating from the EIS as a way to reduce expenditures and expresses its opposition to any activity that would produce an undue environmental burden on our residents, students, and businesses. This includes the removal of debris from work sites and hauling it through high density residential and commercial areas as a way for contractors to reduce costs.

Finally, the Board has for several months brought to the attention of DEP that it has not fulfilled prior agreements to produce jobs for neighborhood residents at the construction site. While we are pleased with the recent progress that has been made to the commitment on jobs through project HIRE and other programs, we believe it still falls short of original commitments made with the community. Jobs were promised as a prerequisite to construction, beginning at the site, and we implore the new DEP commissioner to follow through on these promises.

Health & Hospitals**Addressing Major Health Concerns**

Health concerns in the district are reflective of many of the major health concerns affecting the borough. However, the Board believes that resources to address these issues have not been provided at the same level as in other communities. We request that the Department of Health and Mental Hygiene (DOHMH) and the Human Resources Administration (HRA) work with the community to focus on several health issues that are of great concern to our residents.

Prevalence of Domestic Violence- As reported in the NYC Domestic Violence Annual Report – 2007, published by the Mayor's Office to Combat Domestic Violence, our district, along with several others in the Bronx, is reported to have the highest incidence of fatalities due to domestic violence in the city. There are a number of programs currently in place to bring awareness and provide services to residents,

but there must be a greater level of collaboration between the various mayoral and municipal agencies involved if we are to reduce the incidence of domestic violence in our community.

Substance Abuse and Depression- Substance abuse and depression are closely linked to one another, but both are treatable health conditions. As per the Community Health Profile for 2006 published by DOHMH, residents in our community are 60% more likely to experience serious psychological distress than adults in NYC overall. Additionally, the death rate due to drug abuse (in 2003-2004) was 70% higher in our neighborhoods than in NYC as a whole.

It is imperative that resources to address both substance abuse and depression continue to be funded to avert a return to the days of rampant substance abuse and its subsequent negative effects on our communities. We implore the city to increase its education resources targeting drug prevention and mental health initiatives, especially for our youth. We support the DOHMH's "Teen MindSpace" initiative, targeting teen specific mental health issues, and we ask that additional promotion of the site be conducted in Community Board 7.

Diabetes and Obesity- Diabetes and obesity are epidemic and are major health concerns in our community. Rates for these health conditions continue to increase rapidly citywide, particularly in lower income communities who do not have many food selection choices available to them, further exasperating health disparities between them and other communities. Many residents commute outside of our community to obtain healthier fresh foods, adding an unnecessary financial burden and forcing them to choose between eating healthier or limiting their food choices to provide for other basic needs.

The Board has taken the proactive step of advocating for a large scale supermarket to be constructed as part of the Kingsbridge Armory Development Project that would provide residents with a greater variety of healthier food options and reduce the time and expense related to shopping outside of the district. Our support is based on the research of many health advocates and according to the report "Eating Well in Harlem: How Available is Healthy Food?" by DOHMH. According to the study, "Research suggests that access to food - including the availability, quality, and price of healthy foods, and the presence of supermarkets and advertising - affect the food choices of residents, many of whom shop close to home."

The Board asks that additional health education resources and programs be made available to residents locally to educate them about this epidemic. Programming in schools, such as the SPARK afterschool program sponsored by DOHMH, provides for physical activity programs that are desperately needed for our youth. We also support and encourage the expansion of the DOHMH "Health Bucks" program, which helps to promote the consumption of produce from local farmers' markets and is used to educate participants as to the benefits of healthier food choices.

HIV and AIDS- According to our Community Health Profile, "the rate of HIV diagnoses is more than 60% higher than the NYC rate, and the people living with HIV/AIDS in the community is 40% higher than the NYC rate". The report also states that while residents in the community are more likely to get tested for HIV, "nearly one-third of HIV test results are 'late' diagnoses, indicating that the disease has progressed to AIDS".

We support the DOHMH initiative to expand testing to all Bronx residents so that individuals are aware of their status and have access to treatment as early as possible if they are diagnosed with HIV/AIDS. We believe that the agency needs to both expand its outreach efforts on their initiative and provide resources to residents "post-diagnosis" so that they receive the appropriate care and support.

Teen Pregnancy- Teenage mothers and their babies face numerous health risks and socioeconomic strains then older mothers. Many teenage mothers tend to have less disposable income and often times do not finish high school, while their babies tend to have lower birth weights and other health issues associated with weight. While the teen birth rate has decreased over the last 10 years, the average birth rate of teen mothers in our community is nearly 50% higher than the NYC rate.

We strongly urge DOHMH to provide the necessary resources to our teens, especially to our middle and high school youth, to reduce the incidence of teen pregnancies in our community. We also believe that the Department of Education needs to expand its sexual health education program and work closely with DOHMH to ensure that all principals are in compliance with educating students in our district.

Housing

Affordable Housing

Our office has seen an increase in the number of individuals who state they can no longer afford their rent and are being forced out of their homes. The majority of these cases have been individuals who are elderly or have health issues and are on a fixed income. Other cases include working families that have never received public assistance and can no longer afford their rent, individuals being turned away from housing because they are on public assistance, and residents moving in from other neighborhoods.

The city must do more to promote its rent assistance programs for our neediest residents and increase both funding and availability for the SCRIE and DRIE programs (Senior Citizen/Disability Rent Increase Exemptions). We ask that the Department for the Aging (DFTA), Housing Preservation and Development (HPD), and the Department of Finance (DOF) to provide additional resources to both residents and property owners in our community so that they can enroll in these programs.

Neighborhoods that are economically stable also experience a degree of social stability. Affordable housing must include assistance for working families to become home owners without repeating the financial mishaps that resulted in our current financial crisis. The NYC Economic Development Corporation and HPD should encourage developers to construct affordable cooperative housing so that working families can purchase housing and build equity for their families.

Residents' Quality of Life and Self-Certification Abuses

There are many concerns from our residents who have endured substandard living conditions and do not trust in the city agencies to assist in the remediation of glaring violations in their apartments. Many tenant advocate groups place the blame on the Housing Preservation and Development's heavy reliance on self-certification for compliance of violations found in a building or apartment.

Self-compliance does not work well unless it is accompanied by a thorough system for verification and enforcement than what currently exist. We urge HPD to increase its current code enforcement personnel and Emergency Repair Program contractors so that it is not as heavily reliant on the self-certification process and to address the concerns of our residents adequately.

Zoning Regulations and Overdevelopment Concerns

Overdevelopment is an irresponsible approach to urban development and has had many negative implications on our residents. With the rampant overdevelopment without regard to our communities' needs, we now have the third most overcrowded school district in the city, unemployment rates in some communities approaching 10%, and many other issues that contribute to a decrease in our quality of life.

Additionally, our community has seen an increase in the number of developments that house formerly mentally ill or homeless individuals from outside of the community district. While the Board has been supportive of these institutions in the past, we are concerned that residents from within our own community are not given a sufficient opportunity to partake of these programs.

The Board has placed a great deal of emphasis on the sustainability of our neighborhoods and is working with the community and the Department of City Planning (DCP) to rezone various areas to address the issue of overdevelopment while still encouraging development in underserved areas through the DCP's 197C Program. In addition, the Board has put forth a proposal to develop a 197A Plan to recommend long term, sustainable development plans and goals, based on community input, to the city.

We ask our local elected officials to support both of these proposals and work with the Board to help create sustainable neighborhoods in our district.

Long Term Planning

Kingsbridge Armory Development Project and Vicinity

The Kingsbridge Armory is a city, state, and federal landmark in the center of our district. Originally used as a drill hall and headquarters by the National Guard, the Armory now sits dormant in our community for over a decade. There have been several attempts to develop a plan for the Armory, but for the most part it has remained vacant.

Now a plan has been presented to the Community Board to redevelop the Armory which will spur economic development and revitalize the surrounding neighborhoods. The Board is working closely with the developer and residents to develop a plan that provides for: job and career development, retail space for minority and women-owned businesses, community space for activities and programming, and addresses the various socio-economic concerns for residents and businesses in the vicinity.

It is important for the district to have the full support of the Economic Development Corporation and the local elected officials to support the Board and offer recommendations that will make the Armory a lasting success in our community. It is important to remember that the Armory is a part of our community's history and that we should work diligently to both preserve its grandeur and develop a beacon of hope and opportunity for future generations in our district.

Access to the Jerome Park Reservoir

Many communities in upstate New York currently have access to the reservoirs for recreational activities without compromising water quality or safety concerns to the drinking water system. The Department of Environmental Protection has mentioned that access to our own Jerome Park Reservoir is not possible due to the security concerns.

We ask that the city, especially DEP, devise a balance between security concerns and public access to the park space so that residents can utilize the area. We ask DEP to provide the community with detailed security concerns at the reservoir and discuss with residents and civic groups scenarios where access to the reservoir could be implemented.

Fordham Landing / Kingsbridge Heights Waterfront and Water Taxi Initiative

Recently, the Bronx Borough President sent a letter to the Mayor requesting the city to purchase through eminent domain a 3.7 acre property along the Harlem River in what is known as Fordham Landing. The

intent is to transfer the land to the Department of Parks and Recreation for the development of a greenway with waterfront access for the community.

Currently, the district does not have access to most of our waterfront because it is underdeveloped. The board also supports the acquisition of the property at Fordham Landing to create waterfront access for recreational purposes for community residents. In addition, we ask our elected officials to look into purchasing the properties just north of Fordham Landing in the Kingsbridge Heights area for the purposes of reclaiming our waterfront and extending the greenway.

Additionally, regional transportation experts have projected a steady and continuous growth of businesses, commuters, and residents in the metropolitan area and it is important that the Bronx expand its existing transportation network to meet this demand. Simultaneously, we must be conscientious of the potential environmental impact on neighborhood residents and explore alternative transportation methods to better meet the projected demand.

A water taxi system along the Harlem River just north of the University Heights Bridge, preferably near the Fordham Road exit of the Major Deegan Expressway, along with an accessible waterfront, esplanade, and green space, is a strategic location because it could divert traffic from the nearby expressway and provide commuter service to points along the Harlem and Hudson Rivers. Additionally, a water taxi would provide another option for area residents to commute into Manhattan and bring relief to overcrowding conditions on existing subway lines.

The expansion of our waterways as a means of alternative transportation is supported by our current Mayor's PlanNYC, and we ask that the NYC Economic Development Corporation begin looking into the viability and cost projections for a water taxi system in our district.

The district needs public access to the waterfront as is available in the other boroughs to revitalize what has been an undeveloped and underserved area for many years. We believe that the Fordham Landing / Kingsbridge Heights Waterfront will provide many recreational and commercial activities and bring vibrancy to the Harlem River and surrounding neighborhoods.

Webster Avenue Rezoning Initiative

In these times of fiscal uncertainty, it is vital that we spur local economic development to ensure that our communities are not subject to the damaging effects of divestment, a still vivid memory from the late 70's and early 80's for many Bronxites. The Webster Avenue Rezoning Initiative proposes to allow new development in an area while protecting the surrounding areas from overdevelopment.

This initiative allows for the development of both inclusionary and market rate apartments to be developed along large portions of Webster Avenue between Fordham Road and East Gun Hill Road. In addition, it requires developers to create ground floor commercial space and residential parking facilities, thereby bringing jobs and business opportunities to the community and minimizing the impact of limited parking space.

The initiative also includes areas for larger scale commercial development to diversify the types of businesses that can be established, including professional office space and schools on both ends of the corridor with the intent to create jobs and economic opportunities for area residents.

However, for the project to succeed, we ask that the city continue to fund a number of initiatives, including funding to create affordable, inclusionary housing, allocating monies for the construction of more schools, and opportunities for small businesses to develop and succeed such as Avenue NYC.

Parks and Recreation

Renovation of Mosholu Parkway and Adjacent Parkland

Mosholu Parkway intersects through our district and serves as a greenway between our major parks (Van Cortland and Bronx Park/Botanical Gardens), a connector to our major roadways (Bronx River, Saw Mill, and Henry Hudson Parkways), and a scenic respite from the surrounding urban environment for our residents.

There are discussions between community organizations in our district and the mayor's office to redesign portions of the parkway to increase the amount of available green space and address traffic flow issues. However, there are other issues that need to be considered in the renovation of the parkway to address long standing community complaints.

Chief amongst these complaints is the constant flooding that occurs on the parkway, especially during the winter months. The areas on the parkway most affected are around the intersections of Bainbridge Avenue and Hull/Marion Avenues, which separates Norwood, a major shopping area, from the northern part of Bedford Park, which is primarily residential with a high concentration of senior citizens. Curb lines and sidewalks are broken, making it difficult for some to cross in fair weather. During and after rain or snow storms, the intersections become flooded and impassible for most.

Area residents have complained to multiple city agencies over the last few years and have not received the appropriate response to this longstanding issue. There are several agencies that must collaborate to remediate this situation, starting with the DEP, so that further damage does not occur to the parkway and for the safety of our residents.

As important as the flooding is the one of the major causes for it, soil erosion from the adjacent park lands. The parkway lies in a valley bordered by large strips of parkland. Lack of proper maintenance and enforcement of quality of life issues (i.e. dumping of charcoal and other contaminants) has caused many barren areas, allowing soil and debris to flow onto the parkway and obstruct the catch basins. These parklands desperately need maintenance and we implore the city and specifically the Parks Department to remediate the issues affecting our parkway.

Enforcement / PEP officers and Security Issues

Security issues are a major and growing concern in our parks, especially at our recreation centers. Based on the NYPD CompStat reports and community complaints, what should be a welcoming setting for our youth is often times the reverse, a hostile environment where gangs, violence, drugs and other negative quality of life issues occurring on a frequent basis.

Our recreation centers, Williamsbridge Oval and St. James Park, are the most affected by these quality of life issues. It has been brought to our attention that in July 2008, Williamsbridge Oval incurred thousands of dollars in an overnight vandalism spree that destroyed resources that were part of an afterschool program. Likewise, St. James Park has seen a reoccurrence of teenage prostitution and the office has received complaints of open drug dealing at all times of the day.

The community requires that the Parks Department increase the number of Parks Enforcement Personnel (PEP) officers and patrols at our parks to assist in making our parks a safer environment for all of us. The district office recommends that more lighting be installed where necessary, parks and playgrounds be properly closed at the appropriate times, and that there be more collaboration with the community board and the NYPD to address situations as they arise.

Public Safety & Quality of Life

CompStat Reporting and Trends

We are very thankful that we have had the courage and leadership at the 52nd Precinct over the last several years that has resulted in a steady decrease in major crimes as reported in CompStat. The 5-2 has been responsive to and continues to work with the district office on many issues raised by the community. More recently, the 5-2 has worked with the district office on more detailed statistics that will assist us in planning and service delivery with other city agencies.

Quality of Life Issues Affecting Residents

Of concern to community residents is the perception that quality of life (QOL) issues are not being addressed as aggressively as the major crime indicators as reported on CompStat. The four most frequent quality of life issues affecting our district as reported by several city and mayoral agencies are:

Prevalence of domestic violence- CB 7 is one of several districts in the Bronx with the highest rate of fatalities resulting from domestic violence. Many instances of domestic violence are often unreported to the police and victims often don't have access to resources to help them.

Nightlife disturbances and residential quality of life- There is a growing problem with disorderly conduct and violence related to nightlife establishments (both legal and illegal), especially those serving alcohol, and constant disruptions to our residents.

Rise in youth and gang violence- Many residents have complained to the district office that they have witnessed or know someone who is a victim of gang violence. Unorganized gangs as are prevalent as organized gangs and many residents have expressed that they do not feel their neighborhoods are safe.

Curbing graffiti vandalism- Graffiti vandalism is a chronic blight throughout our district and has many property and business owners spending thousands of dollars annually on removal. The district office has worked with the Community Affairs Unit in bringing free graffiti removal programs to the neighborhood. Yet, this and other programs are not sufficient in addressing the problem and residents are expecting more from the NYPD.

Staffing Concerns

The community is thankful that the city recently approved a measure to increase the starting salary of officers and hopes that it will lead to more officers and longer retention. The district was the recipient of many officers as part of the Impact Program until this summer, where many officers were redeployed throughout the borough.

Even with the Impact Officers assigned to the 5-2, the number of officers assigned to the precinct is not at the same levels as in previous years. Part of the problem is the overcrowded conditions that currently exist in the precinct, which has more officers that it can physically hold and has not kept pace with the population growth we have experienced over the last few years. We believe that it is in the best interest

to the district that the city purchase property near the current precinct to build a new, modern facility that would accommodate current and future officers and vehicles.

Senior Services

Funding Formula for Existing Centers

Recently, the Department for the Aging (DFTA) has set what is being criticized as an unrealistic and unattainable benchmark for determining how well senior centers are being utilized. Many senior residents feel that the city is using the benchmark as a way to justify the closing of centers in the immediate future. Senior citizen advocates cite that the criteria for determining center utilization limits itself to how often seniors use the onsite meals program and does not include other programming that might take place throughout the day.

The Board continues to support the position that the proposed funding formula does not take into account the true utilization of our centers and voices its opposition to the proposed DFTA plan. In addition, the community supports the allocation of new capital funds to our centers to offset previous reductions and to decrease each center's reliance on having to solicit outside funding in order to operate.

Our centers are often times the only available resource for information, meals, and socialization for many seniors in our community and more must be done to ensure that they are able to weather the current economic downturn. We implore DFTA and elected officials to not turn its back on our seniors and provide the funding to maintain all of the city's senior centers.

Traffic & Transportation

Street Maintenance Issues

The district office has worked closely with the Department of Transportation to address a number of street maintenance issues and community complaints. The district has many major commercial corridors and roadways, including the northern end of the Grand Concourse, which are heavily utilized. However, appropriate funding to repair our major roadways is insufficient considering the number of vehicles and buses that utilize our roads, especially in light of the population growth we have been experiencing and are projecting in the coming years. In the best interest of maintaining our roadways, it is recommended that DOT reexamine the amount of funds allocated to the district for street milling and repaving to determine if additional monies are warranted.

Public Plazas Program

There has been much concern generated over the DOT's proposed "Public Plazas" initiative by community groups and the Board. The program requires private organizations, primarily non-profits, to sign maintenance agreements with DOT in exchange for the agency to renovate public space in a neighborhood. These organizations are also expected to provide programming at a fee to other groups for the purpose of covering maintenance costs.

Many in the community feel that the program is designed to shift the burden of maintaining public streets onto private organizations as a way to save on costs and street/curb enhancements. Based on information provided by DOT, organizations would also have the additional burden of having to provide for liability insurance for the plaza as a precondition for joining this program.

The Board considers the latter as a major impediment for many communities who may not have the economic resources to participate in this program and believes it precludes them from having plazas in

their neighborhood. Organizations in our district who were interested in participating in this program as a way to enhance the community's quality of life have balked at the prospect of being held liable for what might occur on a public street.

There are a number of areas within our district that would benefit from public plazas and we ask that DOT reexamine the criteria used to implement this program so that it does not exclude neighborhoods from participating. Maintenance agreements could involve public/private partnerships with multiple organizations so that it will be cost effective to implement and less burdensome on any one organization. Finally, plaza design should include community board input and approval prior to implementation as a way to increase participation and support for projects that might be located within a district.

Youth Services

Employment and Mentoring Programs

A major concern for the community, especially in these troubled economic times, is the lack of employment opportunities for youth and young adults in our community. In portions of our community, the unemployment rate for young male adults is as high as 14%, and there are few opportunities for skill development that would prepare these individuals to enter the workforce.

Therefore, it is highly recommended that the Department of Youth and Community Development (DYCD) promote existing programs to a greater extent in economically distressed neighborhoods. Furthermore, we implore the city to not reduce funding for existing DYCD initiatives such as the Summer Youth Employment Program and the Neighborhood Advisory Boards, as it is counterproductive for the city to balance its budget at the expense of our youth.

Finally, now more than ever, we need the city to provide leadership to our youth by encouraging mentoring programs that will prepare our community's youth for the future by teaching them the skills necessary to thrive in the workplace.

Child Welfare Issue

It is distressful to hear the continued amount of abuse children throughout the city endure, particularly at the hands of those who are supposed to provide for their well being. We applaud the efforts of the Office of Community Partnerships in the Administration for Children's Services (ACS) for working closer with community stakeholders to strengthen safety nets for our children locally. We strongly urge the city to continue to work closely with community stakeholders and provide "one-stop" information services so that partners can focus on protecting children rather than navigating bureaucracies.

Of great importance is the availability of childcare services that would provide information and services to support families. We ask ACS to expand its marketing of its subsidized child care program so that families can take advantage of the opportunity for free or low cost childcare in their neighborhoods.

Closing Statements

On October 21, 2008, the board members submitted their "Service Program Priorities for FY 2010" survey at the general board meeting. This survey ranks how important each of the ninety city services are to the district and is not an indication of how effective the service is delivered. Services are grouped into one of five priorities from highest (A) to lowest (E) rank. The results of this survey can be found in Appendix A of this document.

Community Board 7 is committed to working with the respective agencies in order to achieve the goals mentioned in this document. We are also requesting that the city restore funding to the Community Boards in order for the office to do its job effectively. Without the necessary resources, this office cannot properly advocate for or express the community's needs effectively through the current process.

Community Boards were developed for the purpose of having residents participate in government locally and to address their needs. This also includes the need to share information captured by the 311 system in a manner that is cooperative to the district office so that the information can be disseminated to district residents.

This office does not agree with the position that the Department of Information Technology and Telecommunications (DOITT) has taken that information coming into 311 must be obtained from the city agencies individually. The relationship between the District Office and the 311 system should not be perceived as a competitive one and we request that data relating to call volume and request type be made available by community district to each of the community boards on a monthly basis.

Furthermore, we ask for the support from the mayor's office, the city agencies, and our elected officials that the concerns of each neighborhood be considered and discussed in a respectful manner to help everyone through these times of uncertainty. We want to do our best to reassure families and individuals residing in Bronx Community Board 7 that we in government are committed to their well being and that they are able to live and thrive in this neighborhood as in every other neighborhood in city.

In conclusion, the Chairperson, District Manager, Board Members, and residents want to extend our thanks and appreciation to the Mayor, Borough President, City Council, and the city agencies for their continuing assistance in addressing our concerns and in supporting our community.

Respectfully submitted,

Gregory W. Faulkner

Gregory W. Faulkner
Chairman

Fernando P. Tirado

Fernando P. Tirado
District Manager

APPENDIX A: COMMUNITY BOARD SERVICE PROGRAM PRIORITIES FOR FISCAL YEAR 2010
