District Manager, Marie Adam-Ovide

Statement of Community District Needs and Priorities FY 2014

Community Board 8, Queens is bounded by the Long Island Expressway to the north, Hillside Avenue to the south, Van Wyck Expressway to the west, and the Clearview Expressway to the east. It includes the communities of Briarwood, Flushing Suburban, Flushing Heights, Fresh Meadows, Hillcrest, Hillcrest Estates, Holliswood, Jamaica Estates, Jamaica Hills, Kew Gardens Hills, Utopia and West Cunningham Park. These communities are overwhelmingly residential with several commercial strips.

The residents of Community Board 8 are middle income, multi-ethnic, multi-racial people who own their own homes and co-ops or are renting. The residences consist of one and two-family homes, garden apartments, large apartment buildings such as the Fresh Meadows Development and Cunningham Heights, co-ops such as Electchester, Hilltop Village and the New York City Housing Authority complex - Pomonok. The Community Board 8 residents are concerned with quality of life issues, personal safety and security, education and maintaining their fair share of city services.

Community Board 8 houses major facilities such as Queens College, CUNY Law School, St. John's University, Queens Hospital Center, Cunningham Park, and many public and private schools.

Police

Community Board 8 has consistently designated the funding of additional police personnel as one of its top Expense Budget Priorities. The 107th Precinct's officer count has been dwindling for several years. It is not always possible to do more with less; especially, when it comes to the safety of our community.

It should be taken into account when police personnel are allocated to the precincts that Community Board 8 has over 40 private/public schools. It has many institutions within its boundaries, including Queens College, CUNY Law School, Queens Hospital Center, Holliswood Hospital (Mental Health Facility) and St. John's University. The latter has 500 students and staff in its new dormitory, which opened a year ago. Queens College's dormitory added hundreds of students as well. In addition, there is a drug rehabilitation program that opened its doors a few years ago at the former site of the St. Joseph's Hospital on Union Turnpike. We have a great number of houses of worship serving many denominations with growing memberships. People are entitled to worship in peace whenever they choose and know that they are protected from terrorists.

The 107th Precinct has been doing its best with very limited resources; however, more officers are needed. The Board commends the men and women who work so diligently and put their lives on the line every day on our behalf.

There are only 50 auxiliary police officers in the Auxiliary Police Program within our district. A van is needed to transport these officers to many community events that occur in the Community Board District including National Night Out, Big Apple Circus, the New York Philharmonic and Metropolitan Opera. Bullet proof vests are vital.

To keep our subways safe, we require enough officers and supervisors for Transit Bureau District 20. New computers are needed for the administration area located at the Briarwood station.

Environmental Protection – Flooding continues to be an issue for Community Board 8. Very little has been done to alleviate this problem. Fresh Meadows/Flushing had a major flooding this month. The flow monitor study conducted last year proved that there were flaws in the sewer system, yet nothing has been done to address the problem. The following are necessary:

- Design and construct storm sewers to prevent further flooding and loss of property in Fresh Meadows/Flushing area.
- Construct storm sewers on Hillside Avenue from Van Wyck Expressway to Clearview Expressway.
- Enlarge sewer lines to accommodate increased development throughout Community District 8.
- Hire sufficient personnel for regular catch basin cleaning and repair work to prevent flooding.
- Increase funding for trench restoration and sewer reconstruction to repair the impaired lines and streets.

Sanitation

Although Community Board 8 has relatively clean streets, there are still several Sanitation issues that require more attention:

1. Streets that are not covered by Street Cleaning Regulations need to be cleaned regularly.
2. The paved center malls require year-round cleaning and seasonal weed-control.
3. Retain the five day-a-week pick-ups at public schools and extra pick-up at Pomonok Houses.
4. Sanitation Police are needed for night patrol to discourage illegal dumping.
5. A CB8 dedicated seven-day-a-week pick-up truck for litter baskets in commercial areas.
6. Increased enforcement of sanitation regulations along the commercial strips.
7. Dedicated bulk pick up trucks for large apartment/co-operative developments.

Parks

One characteristic that has attracted residents to Community Board 8 is its suburban nature, which is derived from the open space of its parks and tree-lined streets.

1. Hire personnel or contractors to maintain, prune, and remove dead trees and tree stumps, both in the parks and streets. A gardener or assistant gardener is needed for the parks in CB8. Park maintenance workers are needed to provide security and to protect the City's capital investment in renovated playgrounds.
2. Rehabilitate play areas at Freedom Square, Weinstein Playground and the playground at P.S. 165Q. A new sprinkler system (water on demand or on a timer) is needed at P.S.26 to conserve water.

3. Flushing Meadow Corona Park borders Community Board 8 and is utilized by many of our residents. A 16 cubic yard packer truck is very much needed.
4. Cunningham Park is Community Board 8's major park and as such is heavily utilized. Working in conjunction with the Friends of Cunningham Park, we have prioritized our requests for the rehabilitation of Cunningham Park.
 - We continue to support erosion control throughout the core area – seeding, sodding and an underground irrigation system.
 - Landscaping throughout the core area, shrubs, trees, hardy perennials and bushes
 - Reconstruction of paths throughout the park's core interior especially around the oval and restoration and/or construction of bicycle path from Francis Lewis Boulevard overpass of Vanderbilt Motor Parkway to the underpass at the Clearview Expressway
 - Redesign picnic area (including signage) location maps and directional signs at major entrances and additional flora identification signs for trees
 - A new mini-packer truck and a Toro Ground Master grass cutting unit with the Polar Track System are needed for Cunningham Park

Fire

Community Board 8 is concerned about the adequacy of fire protection, not only within its boundaries but also throughout the entire Borough of Queens.

There is an urgent need to educate the public on fire prevention and to expand the Fatal Fire Reduction Program and Mobile Fire Safety House. We support the increased fire safety events and the number of residents reached. Fire prevention would lower the cost of fighting fires. Funding is needed to purchase smoke detectors and carbon monoxide detectors to distribute to the public. Golf-cart gators are needed to maneuver through large crowds at events throughout the City.

Most importantly, we request funding to renovate the fire houses within our boundaries and those that service Community Board 8. We understand that FDNY facilities are in need of upgrades.

Transportation

We continue to request increased asphalt allocation for street resurfacing. The service roads of the Van Wyck Expressway, Grand Central Parkway, Long Island Expressway and Clearview Expressway must be maintained and cleaned on a regular schedule.

We request stand alone funding for curb installation and replacement. There has been a backlog for curb repair and curb installation for many years. Currently, DOT repairs curbs only where there is a sidewalk violation. As a result, homeowners choose to wait for DOT contractors to do the work instead of repairing their own sidewalks within 45 days of receiving the notice of violation. This appears to be the only way to ensure that DOT repairs their curbs in a reasonable time. This causes sidewalks to remain damaged for a longer period of time and this prolongs the danger to the pedestrians. This must change.

Housing/Buildings

Much of Community Board 8's housing stock is residential, with many one-family homes. Additional Buildings Department inspectors are necessary to enforce existing regulations and quality of life violations. Additional plan examiners are needed to review and respond to Development Challenge Process. More plan examiners would also eliminate the self-certification by architects and engineers.

There are very few rent stabilized and/or rent controlled apartments within Community Board 8. The lack of affordable regulated housing has caused a larger number of homelessness, overcrowding in neighborhoods and especially illegal apartments. Government must start to build additional affordable housing and encourage the private community to do so as well. Especially when so many families have lost their homes to foreclosures, affordable housing is much needed.

Pomonok Houses, although one of the better public housing developments in the city, has several issues that have to be addressed. The infrastructure has to be continually upgraded. The electricity needs upgrades. The cabinets, windows and appliances need to be replaced. Funding is needed to repair the roads within the development. A community center that would offer educational programs, job training and activities for the youth is welcomed.

There is a definitive need to increase the number of officers at PSA9 to prevent criminal activity especially due to the lack of a security system. The addition of a security system would greatly increase security and deter crime.

Human Services

Community Board 8 has many human service needs, particularly among the elderly, single parent families, youth, the unemployed, new American citizens and recent immigrants. Several issues that need to be addressed are education, outreach and preventive programs dealing with domestic violence, AIDS, parenting skills, family preservation, child abuse and affordable quality day care.

Youth

Youth programs and services have always been one of the top priorities of Community Board 8. The Beacon Schools are a welcome oasis providing many after-school and evening recreational programs and activities. Additional funding is required for summer youth employment positions.

Services to address youth unemployment and develop job programs to serve youngsters from middle-income families are also needed. The problem of gangs, graffiti, youth substance abuse and truancy affect youngsters in the district. Increased mentoring program for boys and girls to help them resolve issues that arise during pre-teen and teenage years is needed.

Over a quarter of Community Board 8's general population is under the age of 21. Dollars invested in youth today will save more funds that may go to the justice system tomorrow.

Seniors

Community Board 8 is in need of an additional Senior Center to provide nutritious meals and socialization to accommodate the Board's growing senior population. It is vital that we maintain the delivery of a daily hot meal for our seniors. Both seniors and youth would also benefit from an intergenerational program.

Hospitals

We will continue to monitor development on the Queens Hospital Center campus. The Health and Hospitals Corporation should take all the necessary steps to retain and renovate the "T" Building. Its utilization can be increased over time to meet the health care needs of patients in Queens.

We are also concerned with the threat of the West Nile Virus, as mosquitoes infected with WNV were detected this summer within Community Board 8 in zip codes 11365 and 11423. We need a concerted effort to continue the control of the mosquito population before the virus is found in humans. In addition, the Department of Health and Mental Hygiene should be made aware of the location of the nuisance mosquitoes to respond accordingly to eradicate this problem. Funding should be set aside for this purpose. It should not be left to each Council Member to fund aerial adulticiding of nuisance mosquitoes in their districts.

Libraries

It is imperative that all of our libraries are open seven days a week to service the needs of our community. Furthermore, we seek increased morning and evening hours. We seek additional computers and services (youth, immigrants and seniors) at the six branches of the Queens Borough Public Library located within Community District 8. Many individuals do not possess a computer and the libraries are the only venues where they have free access to the web. We continue to support the rehabilitation of the Kew Gardens Hills Library. The Briarwood library needs expansion or a new building to cope with the increase demand for service. In addition, the Hollis Branch requires rehabilitation.

Education

Community District 8 is within Region 3. Good schools with small classes are vital to CB8. We will continue to advocate for new schools and quality education to accommodate the Board's growing school aged population. There are not enough seats or classrooms for our children in all levels of education.

Community Board

Mayor Michael Bloomberg has shown his support for community boards and we continue to thank him for all that he does. We are often the first line of communication for community residents to New York City agencies. We cut through red tape and bureaucracy. We receive many referrals from 311. We continue to solve issues that 311 cannot, especially issues involving more than one agency. We monitor the delivery of City services, resolve thousands of complaints each year, and hold public hearings on zoning, ULURP and budget matters. We publish a monthly Newsletter that is widely distributed throughout our community and fulfill all of our charter-mandated responsibilities.

Our budget covers payroll, office supplies, telephone, postage, office equipment, etc. We have 48 civic minded Board Members who offer their services to the City of New York for the betterment of our community. We are requesting that our budget be maintained at its current level.

Conclusion

Community Board 8 continually strives to deliver services to its residents, which is mandated by the City Charter. We continue to fight for our fair share of City services owed to the diverse population of our Community District
